To the Hiring Team & Talent Acquisition Partner,
GE Aerospace
Re: Application for Engines Engineering Intern/Co-op - Computer or Software Engineering (Saugus, MA, Sharonville, OH)

Dear Hiring Team at GE Aerospace,

I am writing to express my enthusiastic application for the Engines Engineering Intern/Co-op - Computer or Software Engineering role at GE Aerospace. As a graduating professional with a BBA in International Business from Dayananda Sagar University (DSU) and verified hands-on execution leadership across large-scale commercial operations (including AERO INDIA 2025 and Instawork AI), I have built a career foundation centered on deliverable velocity, data accuracy, and rigorous SLA compliance.

Key Highlights of My Experience Relevant to GE Aerospace:
• Grounded Operational Excellence: At AERO INDIA 2025, I coordinated high-security vendor operations and inventory tracking for 300,000+ attendees at Yelahanka Air Force Station, maintaining 100% SLA adherence and zero inventory reconciliation errors.
• Data Precision & Automation: At Instawork AI, I audited over 10,000 machine learning dataset pipelines, achieving a 99.4% precision accuracy standard and writing automated Python workflows that eliminated manual spreadsheet bottlenecks.
• Verified Core Skills in cross-functional operations and analytics: The responsibilities outlined in your requisition require decisive ownership, structured problem-solving, and cross-functional communication—competencies I demonstrate daily.

I operate with high grit, zero ego, and a relentless focus on bottom-line outcomes. As an immediate joiner based in Bengaluru with zero notice period, I am prepared to contribute from Day 1.

Thank you for your time and consideration. I welcome the opportunity to discuss how my operational discipline can drive immediate value for GE Aerospace.

Sincerely,

Aditya Mehra
BBA International Business | DSU Class of 2026
